

Cancer IS Curable! Where to Seek Successful Answers.

by Dr. Garry F. Gordon, MD, DO, MD (H)

Cancer is preventable, treatable *and* reversible! Anyone treating Cancer patients with alternative approaches needs to keep fully informed of the good things you can legitimately offer to every cancer patient at any stage of the disease. I am incredibly excited about the latest research recently presented at the Healthy Medicine Academy Conference, "Cancer Strategies: Improving Outcomes and Quality of Life", and the incredible wealth of information available through Marcus Freudenmann's excellent web site 'Holistic Cancer Healing' (<http://cancer.maxawareness.com>). These resources, along with my F.I.G.H.T. For Your Health program, are truly helping to stem the tide of cancer today!

Marcus Freudenmann is the founder of MaxAwareness, a private research and education resource that *"aims to be the first and foremost in providing world leading resources, information and education in regards to Alternative, Holistic, Integrative, Complementary and Spiritual cancer treatments."* Embarking on a 3-year journey around the world, Marcus interviewed 31 of the world's leading experts, doctors and oncologists about better possibilities for preventing and treating cancer and disease. He has released this life-saving wealth of information on a DVD entitled "Cancer is Curable Now". This inspirational and "must-have" resource teaches us how to help the body achieve and maintain the best possible health, prevent disease and heal from cancer.

Many leading integrative physicians and health care professionals are recommending this DVD for their patients and families. Dr. Robert Rowan, author of 'Second Opinion Newsletter', along with his wife, Dr. Terri Su, say that ""Cancer is Curable Now is the best video on the subject we have seen", and "we will share this video with all of our cancer patients". Kent L. Pomeroy, MD, MD (H), says "I am personally and professionally grateful [for those] who put together and presented the information in the DVD, 'Cancer is Curable Now'. The knowledge and enthusiasm of each speaker inspired me to do a better job of curing my own cancer".

Another invaluable resource for those seeking natural therapies against cancer comes to us from the Healthy Medicine Academy Conference, "Cancer Strategies: Improving Outcomes and Quality of Life". Held on March 25th through the 27th, 2011 in Scottsdale, Arizona, the conference presented some very exciting research from several of the most expert integrative health care professionals. Topics covered included information on the current state of integrative oncology practices in the U.S., Intravenous Vitamin C, diet and nutrition in once-metabolic syndrome, acupuncture and homeopathic remedies in detoxification for cancer patients, electromagnetic fields and cancer, and medical Qi-Gong.

A particularly exciting talk was given by Dr. Bharat B. Aggarwal, PhD, where he presents evidence that inflammation is a link to the cause cancer. An expert in the ancient tradition of Ayurveda, he has published dozens of scientific articles documenting the efficacy of natural herbs and spices in the treatment of disease, especially the popular Indian spice turmeric, or curcumin. Dr. Aggarwal shows how all cancer therapies should include high quality absorbable curcumin, as it provides the same effects as standard chemo does! Curcumin has been shown to exhibit antioxidant, anti-inflammatory, antiviral, antibacterial, antifungal, and anticancer activities and thus has a potential against various malignant diseases, diabetes, allergies, arthritis, Alzheimer's disease, and other chronic illnesses. These effects are mediated through the regulation of various transcription factors, growth factors, inflammatory cytokines, protein kinesis, and other enzymes. Curcumin exhibits activities similar to recently discovered tumor necrosis factor blockers (e.g., HUMIRA, REMICADE, and ENBREL), a vascular endothelial cell growth factor blocker (e.g., AVASTIN), human epidermal growth factor receptor blockers (e.g., ERBITUX, ERLLOTINIB, and GEFTINIB), and a HER2 blocker (e.g., HERCEPTIN). Considering the recent scientific bandwagon that multi-targeted therapy is better than monotargeted therapy for most diseases, curcumin can be considered an ideal "Spice for Life".

Another intriguing presentation came from Karl Maret, MD, who addressed the relationship between electromagnetic fields (EMFs) and cancer, with particular focus on our modern telecommunications and the current changing microwave and magnetic environment. Our Earth's natural and protective electromagnetic field is in decline, most rapidly losing 10 to 15 percent of its strength over the last 150 years. With the increasing use of electricity and wireless technologies every day and almost everywhere, Dr. Maret theorizes that these technologies have contributed to major mitochondrial dysfunction in our bodies, which in turn has contributed to the modern epidemic of auto-immune related diseases, including cancer. Energy medicine is one of the most exciting new developments in health and longevity, and in my opinion, represents a "missing link" in successful treatment and real healing, and I will be reporting more from this area in the future.
